

Jungle City Studios Penthouse Studio East features a retro futuristic design which includes a cutting edge 48-input SSL Duality Console and a vintage EMI TGI12345 Mark III Console. One of only 20 built for EMI Studios in Europe, the rare EMI Mark III has been totally refurbished and recapped. With the perfect blend of analog and digital gear, Jungle City's Penthouse Studio East can accommodate any project. Whether it's recording or mixing an album project, 5.1 surround mixing, video shoots, hosting a listening session or just having an event, the 2400 sq foot space is completely private and is well fitted with all the latest technologies. The Dual 15" Augspurger monitors were built specifically for the dimensions of the room and are beautifully set in the control room glass. Perfectly complimented by Pioneer 1801 Subwoofers powered by our Bryston Amplifiers, the custom speaker system has been refined by some of the industry's leading engineers like Ann Mincieli, Dave Kutch, Tony Maserati and Dirk Noy of WSDG Physics to create the most accurate listening environment in New York City.
