

Lushly appointed with custom work counters, innovative, perforated absorbing diffusers and acoustically-tuned walls, our Studio South is one the most versatile rooms in New York City. At the core of the room is the dual functional Euphonix S5 Fusion console with the ability to become 64-channel digital desk at the touch of a button. The Euphonix S5 Fusion is one of the most cutting edge digital consoles using Avid's latest Madi Converters which allows you to mix utilizing the Euphonix's 40 bit floating point processing.

In addition to being able to mix all in the box, Avid's Eucon control makes it effortless to engage your favorite plug-in parameters directly on the desk itself as well as take advantage of the 16-channel analog I/O to be used for analog summing. The S5 Fusion is the only desk that allows you to mix in 5.1 Surround and Stereo simultaneously. This unique feature gives you the ability to control the sub divisions when your folding down your mixes in 5.1 Surround. Well equipped with a slue of outboard gear, effects processors, and all the latest plugins, you will always get the best mix through our custom 15x Augspurger Main Monitors and 18x Pioneer Subwoofers.
